Recent projects

Examples of code

<https://github.com/polettoweb/vueportfolio2>

<https://github.com/polettoweb/vueportfolio>

<https://github.com/polettoweb/reactportfolio>

UI Engineer

<https://www.manchesterairport.co.uk> - <https://www.stanstedairport.com/> -

<https://www.eastmidlandsairport.com/>

Languages and technologies used: Javascript (Es6 & VueJS), AJAX, JSON, Sass, Restful APIs

As part of the web team I am helping developing the company's main websites improving the old code base, adding and converting VueJS components and optimizing performance.

Frontend Software Engineer

<http://www.missguided.co.uk/> - <http://www.mennace.com/uk>

Languages and technologies used: Javascript (Es6 & React), AJAX, JSON, Sass, PHP, Restful APIs

I am part of the team designated to improve and develop the main websites of the company. I have built A/B testing feature, refactored old code into up to date JavaScript, polishing the Sass framework and maintaining quality and performance.

I am also mentoring and tutoring junior developers using pair programming methodology.

Frontend development Umbraco

<http://www.belling.co.uk> - <http://www.stoves.co.uk>

Languages and technologies used: HTML, Sass, Javascript, AJAX, JSON, GoogleMapsAPI

I have built templates for homepage, product page e various landing pages all around the websites using Gulp and Webpack as task runners. All the code has been versioned with git and bitbucket.

Frontend development Wordpress

<http://www.aqua-pura.com> - <http://www.hickorys.co.uk>

Languages and technologies used: HTML, Sass, Javascript, jQuery, AJAX, JSON, PHP, RestAPI, WebGL.

I have developed the frontend and the automated environment of these projects entirely on my own. Furthermore, I have worked alongside designer and backend developer for the backend part.

I have used Gulp for the automation of development and Sass for the optimisation of the code throughout the entire project. I have, in fact, followed these project from the design part to the deploy in production.

Frontend development on Magento 1 Enterprise Edition

<http://www.brandymelville.co.uk> - <http://www.brandymelvilleusa.com>

Languages and Technologies used: HTML, Sass, Javascript, jQuery, AJAX, JSON, PHP, MySQL, XML, RESTful API, SOAP, MVC structure (Magento)

I have covered the frontend part of these projects all by myself. I had help on the backend. I worked on this project from the wireframe to the production following all the related aspects (Coding, debugging, adaptiveness, responsiveness, cross-browser compatibility, performance, SEO, deployment, versioning).

The results are 26% increase in conversion rate from the old website's version.
